

RESEARCH SKILLS SEMINAR SERIES 2016

# Ethics for Research: Obstacle or Powerful Tool to Enhance Design and Conduct ?

Ethics in research is often perceived as a hurdle to be struggled over.

This seminar will show how it can be embraced by researchers as a powerful tool to enhance study design and conduct.

It will empower researchers to think in ethical terms without seeing themselves 'bio-ethicists'.

Dr Nik Zeps

Nik is the Director of Research at SJGHC Subiaco Hospital and a former member (2006-2012) of the Australian Health Ethics Committee of the National Health and Medical Research Council (NHMRC) of Australia.

He is the Australian representative on the Ethics and Policy Committee of the International Cancer Genome Consortium and has been a member of the UWA Human Research Ethics Committee since 2011.
