

Western Australia Events Update

Innovation in Ag & Food Biotechnology: outcomes for human health

Focusing on the benefits for Western Australia, this event will highlight innovative research with benefits for human health. From medicinal cannabis, to heart health benefits from apples and using lupins and sorghum to address obesity, this event is relevant to everyone with an interest in human health.

With an introduction from Prof Mike Jones, Director of the WA State Agricultural Biotechnology Centre, this is an event with broad appeal and relevance to professionals across the biotechnology spectrum.

EVENT DETAILS

Date: Thursday 28 April 2016

Time: **3:00pm registration** for a 3:30pm start

Presentations will be followed by networking drinks and canapes from 5:30pm – 6:30pm

Venue: Innovation Centre of WA
9 De Laeter Way, Bentley

Registration: **FREE to attend but registration is required**
