Knowledge into Practice: A Lifespan Approach

The **Move.Grow.Engage** Organising Committee (UWA, Curtin & Notre Dame) is pleased to invite you to the 12th Developmental Coordination Disorder International Conference to be held 5th to 8th July 2017 in Perth, Western Australia.

The 12th DCD International Conference encourages presentations addressing a range of issues from etiological factors underlying movement problems to diagnosis/assessment and intervention.

It will aim to take into account broader new and innovative research of relevance, as well as reflect on the importance of multidisciplinary research, the influence of comorbid and associated difficulties such as cognitive, social-emotional and physical participation, and the implications of these for translation into practice.

It is anticipated that these broad aims will be presented with a consideration of the developmental aspects and life-span outcomes for these individuals.
