

Quantitative Western Blotting Workshop

Location: Harry Perkins Institute of Medical Research,
McCusker Auditorium

Presented by:

Mike Yarski, LI-COR Product Manager

Thursday 15th June 2017

9:00am - 11:00am

Millennium Science will be hosting a Quantitative Western Blotting workshop and an Odyssey CLx instrument demonstration. An invitation is open to all of those who are interested in running western blots using the LI-COR Bioscience Odyssey CLx Infrared Imaging System.

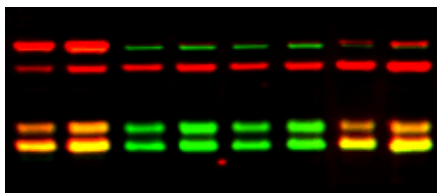

The workshop will cover:

- Overview of near infrared imaging technology.
- The ease of converting from ECL to IR Dye based Western Blots.
- Other applications available on the Odyssey CLx, including: In-cell westerns, coomassie and DNA gels, small animal imaging, tissue section imaging and more!
- Acquiring and optimising scans, including use of ImageStudio 5.2 and ImageStudio 5.2 Lite software analysis packages.
- Troubleshooting advice and tips, including the Do's and Don'ts of Western Blotting.

We look forward to seeing you there!

Get started by downloading Image Studio Lite here:
