

## Cancer Epidemiology Network

# How to Write and Publish in the Peer Reviewed Journals: Top Tips from Editors

This workshop is aimed at people with little or no experience in publishing peer-reviewed papers. It will cover a range of topics including structuring your paper and what to write in each section, as well as what editors are looking for in a manuscript, how to choose a journal, journal instructions, the review process and responding to reviewers' comments. Information about the roles and responsibilities of editors and reviewers will also be provided. Lin Fritschi and Jonine Jancey have both published widely in the peer-reviewed literature and are on the Editorial Boards of Occupational and Environmental Medicine and the Health Promotion Journal of Australia, respectively. They will use their experience from both sides of the publishing process to help you get your work into print.

**Date:** Monday 13<sup>th</sup> November 2017

**Time:** 9:15 am registration, session runs 9:30 am-12:00 pm

**To register:** Email [Sonia.el-zaemey@curtin.edu.au](mailto:Sonia.el-zaemey@curtin.edu.au) by 6<sup>th</sup> November 2017

**Venue:** Room 303, Building 400, Curtin University (Bentley Campus)

**Cost :** Free of charge

**Prof. Lin Fritschi**

Professor [Lin Fritschi](#) is a cancer epidemiologist with a particular interest in occupational causes of cancer. She has a medical degree from the University of Queensland, a doctorate in epidemiology from the Australian National University and is a Public Health Physician with the Royal Australasian College of Physicians. Lin has led many large case-control and cohort studies investigating occupational hazards as well as non-occupational causes of cancer. She has published over 200 peer-reviewed publications in national and international journals and holds an NHMRC Senior Research Fellowship.

**Assoc. Prof. Jonine Jancey**

Dr [Jonine Jancey](#) is Curtin Research Academic. She has worked as a health practitioner and now as a researcher. She has a particular interest in better understanding the impact of physical activity and nutrition across the lifespan and in different settings e.g. worksites, playgroups, retirement villages. Jonine enjoys conducting applied research - research conducted in the 'real world'.
