

Twins Research Australia Seminar and Workshop Program

Introduction to Statistical Analysis of Data from Twins

Wednesday
& Thursday
20-21 June
2018

When:

20-21 June 2018,
9 am–4.30 pm

Where:

UWA Business School ,
Michael Chaney
Case Study Room,
Ground Floor G42,
Crawley Campus,
The University of Western
Australia, Perth WA

Come to this workshop and learn about analysing data from twin studies.

This workshop will cover the exploration, analysis and interpretation of data from twin studies. The workshop will focus on understanding when and why the different statistical models and tests are appropriate, their assumptions and what the results mean in the context of specific research questions. The methods will be illustrated using real data. Familiarity with Stata or R and a basic understanding of linear and logistic regression is assumed.

Cost: \$220 per person

Lunch and refreshments will be provided.

Bring your own laptop and data for the data analysis session.
