

# How to get your Research Published in Peer Reviewed Journals: Top Tips from Journal Editors

This workshop is aimed at people with little or no experience in publishing peer-reviewed papers. It will cover a range of topics including structuring your paper and what to write in each section, as well as what editors are looking for in a manuscript, how to choose a journal, journal instructions, the review process and responding to reviewers' comments. Information about the roles and responsibilities of editors and reviewers will also be provided. Lin Fritschi and Alison Reid have both published widely in the peer-reviewed literature and are editors of Occupational and Environmental Medicine and the Ethnicity and Health, respectively. They will use their experience from both sides of the publishing process to help you get your work into print.

**Date:** Thursday 8<sup>th</sup> November 2018

**Time:** 9:20 am registration, session runs 9:30 am-12:00 pm

**To register:** Email [Sonia.el-zaemey@curtin.edu.au](mailto:Sonia.el-zaemey@curtin.edu.au) by 2<sup>nd</sup> November 2018

**Venue:** Room 101, Building 104, Curtin University (Bentley Campus) **Cost:** Free of charge (Drinks and nibbles will be provided)

**Prof. Lin Fritschi**

Professor Lin Fritschi is a cancer epidemiologist with a particular interest in occupational causes of cancer. She has a medical degree from the University of Queensland, a doctorate in epidemiology from the Australian National University and is a Public Health Physician with the Royal Australasian College of Physicians. Lin has led many large case-control and cohort studies investigating occupational hazards as well as non-occupational causes of cancer. She has published over 300 peer-reviewed publications in national and international journals and she is Deputy Editor of Occupational and Environmental Medicine.

**Assoc. Prof. Alison Reid**

Alison Reid is an Associate Professor in Epidemiology and Biostatistics in the School of Public Health. She has a BSc (Hons) in Anthropology from University College, London, an MSc in Medical Demography from the London School of Hygiene and Tropical Medicine and a PhD in Public Health from the University of Western Australia. Her research interests include the occupational health and safety of migrant workers and community exposure to low dose and non-occupational sources of asbestos. She uses both quantitative and qualitative research methods for this work and collaborates widely on these projects. She has published more than 100 peer reviewed publications in national and international journal.
